

## P6 Packer

The P6 Packer is the ideal solution for dealing with waste in space conscious sites such as apartment blocks, shopping centres, hospitals and office blocks. It is capable of pressing 15-20 x 1,100 Litre bins into 1 x 4 cubic meter bin, achieving a volume reduction of 4-5:1.

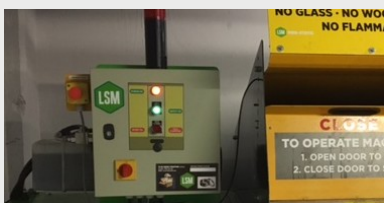

Once the bin is full it can then be transported by specially developed electric truck to the REL waste vehicle. This complete solution is available to rent at a fixed rate from LSM and all our distributors.

### Benefits

- Reduction in labour by more than 50%
- Reduction in bin storage space by over 50%
- Suitable for general waste and recyclables/ DMR
- Monitoring of waste and reduced over use of bins

## FEATURES

Low-voltage user controls for added safety

Materials emptying from closed bin into REL truck

Bin Size can be adapted to site requirement

## SPECIFICATIONS

- ✓ Approximate 15 to 20 1,100 Litre Bins into 1 x 4 cubic meter bin
- ✓ Auto start with electric eye on hopper
- ✓ Power: single phase 2 x kW motor, 16 amp Blue Plug Unit
- ✓ Dimensions (with no bin): 2054mm H x 1697mm L x 1192mm W
- ✓ Standard bin supplied with 4 x H/D Castor wheels for ease of movement
- ✓ Closed leak proof bin
- ✓ Noise level: 70 to 75 dB
- ✓ Machine weight: 600 kg approx.

## OPTIONS

- FOB or Key Pad Control
- Remote Monitoring
- Galvanised Option
- Various Bin Sizes
- Various Hopper Sizes
- Especially designed electric bin truck
